EXPERIENCE

GAME DEVELOPER

2023 - PRESENT

FABAMAQ

- Develop and ship high-performance land-based gaming products using C++ and JavaScript.
- Contribute to the architecture and evolution of the company's in-house game engine and supporting technologies.
- Build internal tools and pipelines for performance analysis, asset management, configuration and development workflows.
- Work across engineering and technical art to optimize rendering, assets and runtime performance from early development stages.
- Integrate casino cash and gaming systems including TITO, SAS and S2S.
- Collaborate with product, mathematics, art and technical-art teams from prototype through production.
- Contributed to multiple commercially successful game releases, including products that achieved record early performance for the company.

TECHNICAL DIRECTOR / LEAD GAME DEVELOPER

2021 - 2023

Fire Raven Studios

- Led development of *Evil Below*, shipped commercially on PlayStation 4 and Steam
- Developed gameplay systems, AI, character controllers and core game architecture
- Worked within PlayStation development teams and console constraints
